SlowKlass

DURANIT SILIACTIVE NITROPOWER

Minigranular fertilizers with stabilized Nitrogen, enriched with Silicon and microelements.

Technology for green areas

ProKlass

SlowKlass

Minigranular fertilizers with stabilized Nitrogen, enriched with Silicon and microelements.

Formulations:

	N	P_2O_5	K_2O	CaO	MgO	SO_3	Fe	Zn	SiO_2
MINI 20-5-10	20	5	10	5	2	14	0,1	0,1	1
MINI 5-18-5	5	18	5	5	2	16	0,1	0,1	1
MINI 15-5-15	15	5	15	5	2	20	0,1	0,1	1
MINI 10-5-18	10	5	18	5	2	24	0,1	0,1	1

• Low chloride

Exclusive technology (patents nº ES 2 204 307 and WO 2007/132032 A1) for gradual nutrients release.**DURANIT® Technology.**

Agronomic advantages:

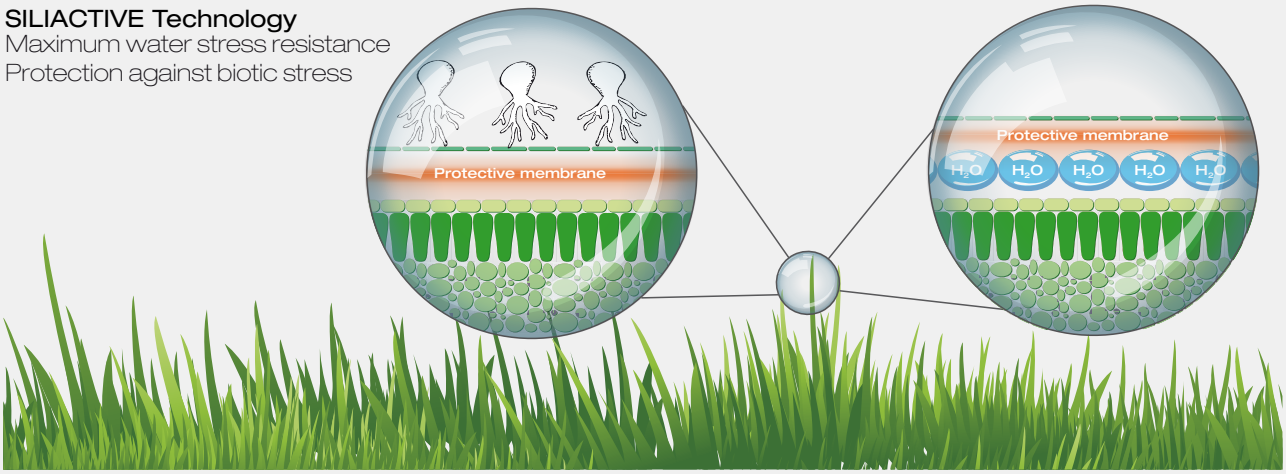

• **Protected Nitrogen,** maintaining Nitrogen availability throughout crop life, in all soil types. **DURANIT® Technology**.

• **Higher resistance to fungal infections**, thanks to higher cell strength of leaves and the synthesis of antistress substances. **SILIACTIVE Technology**.

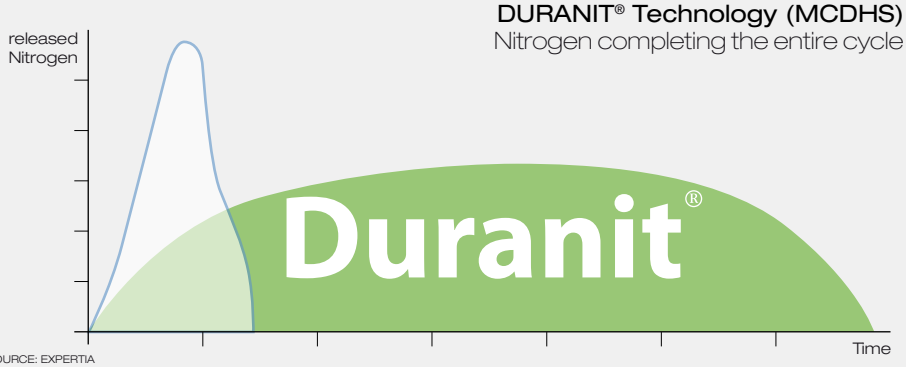

• For obtaining a **turgid and quality grass**, balancing its needs and situations. **NITROPOWER & SILIACTIVE Technology**.

• Designed for **application on grass taller than 6 mm**, for improved distribution, solubility and reduction of losses during the cutting of grass.

SILIACTIVE Technology
Maximum water stress resistance
Protection against biotic stress

DURANIT® Technology (MCDHS)
Nitrogen completing the entire cycle
